

Temperature

Difficulty: Easy

Requirements: You can compile and run a Java program.

Learning outcome: Basic Calculations

Lessions

Convert 20°C, 40°C and 120°C into fahrenheit.
Print the results on the console.

Hints

- For the conversion: http://de.wikipedia.org/wiki/Grad_Fahrenheit/
- Check your solution: $30^{\circ}\text{C} = 86^{\circ}\text{F}$
